DMTF is a not-for-profit association of industry members dedicated to promoting enterprise and systems management and interoperability. Members and non-members may reproduce DMTF specifications and documents, provided that correct attribution is given. As DMTF specifications may be revised from time to time, the particular version and release date should always be noted.

Implementation of certain elements of this standard or proposed standard may be subject to third party patent rights, including provisional patent rights (herein "patent rights"). DMTF makes no representations to users of the standard as to the existence of such rights, and is not responsible to recognize, disclose, or identify any or all such third party patent right, owners or claimants, nor for any incomplete or inaccurate identification or disclosure of such rights, owners or claimants. DMTF shall have no liability to any party, in any manner or circumstance, under any legal theory whatsoever, for failure to recognize, disclose, or identify any such third party patent rights, or for such party's reliance on the standard or incorporation thereof in its product, protocols or testing procedures. DMTF shall have no liability to any party implementing such standard, whether such implementation is foreseeable or not, nor to any patent owner or claimant, and shall have no liability or responsibility for costs or losses incurred if a standard is withdrawn or modified after publication, and shall be indemnified and held harmless by any party implementing the standard from any and all claims of infringement by a patent owner for such implementations.

For information about patents held by third-parties which have notified the DMTF that, in their opinion, such patent may relate to or impact implementations of DMTF standards, visit <http://www.dmtf.org/about/policies/disclosures.php>.

This document's normative language is English. Translation into other languages is permitted.

Foreword

The following files are part of the Redfish development effort:

- DSP0218 - Platform Level Data Model (PLDM) for Redfish Device Enablement Specification - This document specifies the Binary-Encoded JSON (BEJ) and dictionary-based mapping of Redfish schemas and properties into PLDM messages.
- DSP0266 - Redfish Specification - This file is the main Redfish Specification.
- DSP0270 - Redfish Host Interface Specification - This document specifies the "in-band" or "OS-based" Redfish host interface.
- DSP0272 - Redfish Interoperability Profile Specification - This file specifies the structure and JSON document used to define and publish an interoperability profile used to check an implementation's conformance to a defined minimum set of functionality.
- DSP2044 - Redfish White Paper - This is intended to be a non-normative document helping those new to Redfish understand how to interact with the Redfish service and understand common functions and tasks.
- DSP2043 - Redfish Mockup - This is a mockup that can be used as sample output from GETs from a Redfish service. Informative in nature, it was used to develop the schema. A person can set up an NGINX or similar server and configure it to output JSON format and then use this directory for demonstration purposes.
- DSP8010 - Redfish Schema - This contains the Redfish schema definitions. These files are normative in nature and are normatively referenced by the Redfish Specification. There are three schema formats - CSDL (OData Common Schema Definition Language format, which is in XML), JSON Schema, and OpenAPI schema. These schema definitions should be functionally equivalent, thus specifying the schema in two different languages.
- DSP8011 - Redfish Standard Registries - This contains the Redfish registry definitions. This bundle of Redfish registries includes message registries used for Redfish-defined messages, including events, and privilege maps.
- DSP8013 - Redfish Interoperability Profiles - A bundle of published Redfish interoperability profile documents as well as supporting schema and sample documents used for creating profiles.

Redfish Registry Change log

Registry File	Version	Date	Description
StorageDevice	1.0.0	2020-04-30	Initial release. Defines messages for storage devices.
Base	1.8.1	2020-04-30	Errata release. Updated to MessageRegistry v1.4.0 schema.
Composition	1.0.1	2020-04-30	Errata release. Added descriptions to arguments and updated to MessageRegistry v1.4.0 schema.
NetworkDevice	1.0.1	2020-04-30	Errata release. Added descriptions to arguments and updated to MessageRegistry v1.4.0 schema.
ResourceEvent	1.0.3	2020-04-30	Errata release. Added descriptions to arguments and updated to MessageRegistry v1.4.0 schema.
TaskEvent	1.0.2	2020-04-30	Errata release. Added descriptions to arguments and updated to MessageRegistry v1.4.0 schema.
Base	1.8.0	2020-03-27	Added <code>MaximumErrorsExceeded</code> , <code>PreconditionFailed</code> , <code>PreconditionRequired</code> , <code>OperationFailed</code> , and <code>OperationTimeout</code> messages.
NetworkDevice	1.0.0	2020-03-27	Initial release.
Base	1.7.0	2019-12-06	Added <code>PropertyValueIncorrect</code> and <code>ResourceCreationConflict</code> messages.
Base	1.6.1	2019-10-11	Errata release. Fixed typo in the resolution for the <code>NoValidSession</code> message.
Redfish Privilege Registry	1.0.4	2019-10-11	Errata release. Corrected privileges for the <code>AccountService</code> and <code>Session</code> resources to show that anyone can read the account collection in order to find their own account, add to the session collection, and delete their own session. Added

Registry File	Version	Date	Description
			NoAuth to allowed privileges for the service root.
Base	1.6.0	2019-08-08	Added QueryNotSupportedOnOperation, ResetRequired, PropertyValueConflict, ChassisPowerStateOnRequired, and ChassisPowerStateOffRequired messages.
Composition	1.0.0	2019-08-08	Initial release. Defines messages to use for composition events.
ResourceEvent	1.0.2	2019-08-08	Errata release. Corrected and clarified the description and message strings for all messages. Removed CorrespondingMessage property from all messages.
Base	1.5.0	2019-04-03	Added SubscriptionTerminated and PasswordChangeRequired messages.
ResourceEvent	1.0.1	2018-11-29	Corrected @odata.type and Id property formats. Corrected cases where ParamTypes was incorrectly using value.
TaskEvent	1.0.1	2018-11-29	Corrected @odata.type and Id property formats. Corrected cases where ParamTypes was incorrectly using value. Fixed spelling of the TaskProgressChanged event.
ResourceEvent	1.0.0	2018-08-10	Initial release. Defines messages to use for resource events.
TaskEvent	1.0.0	2018-08-10	Initial release. Defines messages to use for task events.
Base	1.4.0	2018-08-10	Added NoOperation message.
Base	1.3.1	2018-08-10	Errata release. Clarified description and message text for GeneralError. Implementations are expected to provide specific Resolution for this message.
Redfish Privilege Registry	1.0.3	2018-08-10	Errata release. Corrected ConfigureComponents plurality privilege throughout. Corrected JSON object structure throughout.

Registry File	Version	Date	Description
Base	1.3.0	2018-04-05	Added <code>PropertyValueOutOfRange</code> and <code>SessionTerminated</code> messages.
Base	1.2.0	2017-08-18	Added <code>ResourceNotFound</code> , <code>ResourceExhaustion</code> , <code>StringValueTooLong</code> and <code>EmptyJSON</code> messages. Clarified description for <code>PropertyValueFormatError</code> . Corrected parameters for <code>ResourceAlreadyExists</code> .
Redfish Privilege Registry	1.0.2	2017-08-18	Errata release. Corrected <code>ConfigureUsers</code> plurality privilege throughout.
Base	1.1.0	2017-05-19	Added <code>ResourceInStandby</code> message.
Redfish Privilege Registry	1.0.1	2017-05-19	Initial release.
Base	1.0.0	2015-11-25	Initial release.
